

## Woolston Eyes Recorded Amphibians and Reptiles Species rev.2014

There are 12 native UK species of these two classes of animals which are:

Amphibians		Reptiles	
<b>Palmate Newt</b>	<i>Lissotriton helveticus</i>	<b>Grass Snake</b>	<i>Natrix natrix</i>
<b>Smooth Newt</b>	<i>Lissotriton vulgaris</i>	<b>Adder</b>	<i>Vipera berus</i>
<b>Great Crested Newt</b>	<i>Tritus cristatus</i>	<b>Smooth Snake</b>	<i>Coronella austriaca</i>
<b>Common Frog</b>	<i>Rana temporaria</i>	<b>Slow Worm</b>	<i>Anguis fragilis</i>
<b>Common Toad</b>	<i>Bufo bufo</i>	<b>Common Lizard</b>	<i>Zootoca vivipara</i>
<b>Natterjack Toad</b>	<i>Epidalea calamito</i>	<b>Sand Lizard</b>	<i>Lacerta agilis</i>

Seven native species, listed below, have been recorded at Woolston Eyes since 1979 and a single introduced species is regularly observed and appears to have a sustainable presence.

		BEDS			
		1	2	3	4
1 <b>Smooth Newt</b>	<i>Lissotriton vulgaris</i>	P3	P	P	P
2 <b>Great Crested Newt</b>	<i>Tritus cristatus</i>	P3	P	P	
3 <b>Common Frog</b>	<i>Rana temporaria</i>	P3	P	P	P
4 <b>Common Toad</b>	<i>Bufo bufo</i>	P3	P	P	P
5 <b>Adder</b>	<i>Vipera berus</i>	P1			
6 <b>Slow Worm</b>	<i>Angus fragilis</i>	P2			
7 <b>Common Lizard</b>	<i>Zootoca vivipara</i>	P	P		
8 <b>Red-eared Terrapin</b>	<i>Lacerta agilis</i>		P	P	

The abbreviations against the species are;

P - Presence reported since the 1979 survey

1 - Probable record – A bullock sustained a head injury in 1983 which according to the Veterinary Surgeon “was comparable with a snake bite”.

2 – Report by David Edwards (WECG Warden) on 19 May 1984.

3 – The 2006 Amphibian Report for No.1 bed
